Electric WAT Dispenser(s)	Better Pack 555e Series	Fully programmable water-activated tape dispenser for high-volume, random sized carton sealing. Little down time experience since the dispenser can hold up to a 1,000ft roll of tape. Features a user-friendly programmable keypad which can be set to dispense up to 120" of tape. To further increase productivity and reduce tape waste, the Automatic Measuring Device (AMD) is an accessory option compatible with the 555eSA. The AMD measures and dispenses the exact length of tape needed to securely seal the carton.	
	Better Pack 500	Cost effective dispenser perfect for rigorous, demanding environments where speed and simplicity are needed. Built with the same safety and performance features as the 555e series, the 500 is a simple, straightforward workhorse. Features 14 preset length keys, one-touch tape dispensing from 6" to 45" and a 2X key that doubles any preset length. Press the random key for custom lengths up to 120".	
	Better Pack 754 / 755	The dispenser of choice for tough, fast paced sealing environments that require an electronic water-activated dispenser compatible with 4" water-activated tape. The Better Pack 754 is ideal for uniform box sealing since the machine can be programmed to dispense in the traditional 1-2-2 tape "H" pattern.	
Manual WAT Dispenser(s) and Label Moistener	Better Pack 333Plus	Economical, dependable dispenser perfect for any application on the light to medium-volume packaging line. Would be a natural fit in packing and sealing environments without access to power. Easy to move or transport from one packaging station to another.	
	TapeShooter 150	Heavy duty all steel construction allows for continuous manual use in environments where lesser machines would have broken down. Perfect manual sealing solution if 4" tape is required.	
	TapeShooter 404	Ideal sealing machine for food service applications found in pizza restaurants, sandwich shops and meat markets. Water-activated tape stands up to moisture as well as excessive hot and cold items. Works well with untreated corrugate, butcher paper and freezer paper.	
	Packer 3S	Reliable pull-and-tear dispenser that is excellent for low-volume use with non-reinforced Kraft water-activated tape.	
	BP6	Shipping and production areas, offices and mail rooms will appreciate the convenient and easy-to-use BP-6 label moistener for gummed labels up to 6 inches wide.

Electronic PST Dispenser	Better Pack PS2A	Electronic pressure-sensitive tape dispenser that best fits in small sub-assembly, light sealing or closing applications where strapping tape and masking tape are utilized. Special adjustable tape core comes standard allowing for 1" to 3" core sizes.	
Case Sealer(s)	Sealmaster 3000 CS	Ideal machine for high-volume, in-line, uniform case sealing processes requiring water-activated tape. The case sealer seals the top and bottom of the carton and is also compatible with the BP E-Z Pull Tab® System which makes this machine appealing to various industries.	
	Sealmaster 3000 AFF	Ideal for applications that require all of the features and benefits of the Sealmaster 3000 plus an automatic flap folder that folds all four top panels for increased productivity.	
Poly-Bag Making System	Better Bagger 900e	Unique poly-bag making system is a perfect machine where multiple sizes and styles of poly bags are utilized, poly bags are purchased in high volumes when only a few bags are needed and/or poly tubing on a roll is being utilized and is manually being cut and sealed.	
Water-Activated Tape	BetterSeal™ Secure Tape (Over 17 styles available)	Top choice for applications requiring secure and tamper evident packages, a cost effective method of sealing, an environmentally friendly seal and/or a printable seal. BetterSeal are high quality water-activated tapes available in over 17 styles of Kraft and reinforced in varying grades, all offering a superior carton seal.	
	BP E-Z Pull Tab® Tape	Ideal solution where product inside the carton is being slashed with a box cutter causing many damaged returns with associated expenses, workers are being injured from box cutters and/or brand image is important. Currently available in Kraft non-reinforced BP E-Z Pull tab tape. BP e-z tape is compatible with configured Better Pack E-Z machines only.	
Accessories	AMD (Automatic Measuring Device)	Compatible with the Better Pack 555eSA and is an innovative packaging solution for any high-volume packaging application sealing random sized cartons. The AMD increases productivity and even reduces tape waste by dispensing the exact length per carton, per seal. Applications will need a work station or bench to properly set up the measuring system.	
	CodeTaper® 6	Compatible with the Better Pack 555e Series, 500, 754/755 and 333 is a great option for those seeking custom printing on demand while utilizing a Better Pack dispenser. Applications that are printing messages on cartons can now print there logo or message right on the tape.	
	Foot Pedal	Compatible with the Better Pack 555eSA and is ideal for applications requiring the operator to be "hands free". A press of the foot pedal automatically dispenses the desired length of tape.	
	Tape Aerial	Compatible with the 555e, 333Plus and the 500 for applications utilizing long lengths of tape. Accessory allows for the tape to remain straight and trouble-free for the operator.
